INFORMATION OF WASTE MANAGEMENT SYSTEM

7.1.3 Facilities in the Institution for the management of the following types of degradable and non-degradable waste

1) Liquid Waste Management-

Decentralized waste water treatment plant having capacity 50000 liters per day is installed in the premises. This treated water is used for gardening purpose. The decentralized waste water treatment plant System consists of

1. Drainage line 110mm PVC pipe.
2. Inspection chambers.
3. Septic tank having capacity: 125000 lit.
4. Sewage Treatment plant: 50000 lit per day
5. Underground water storage tank: Capacity 50000 lit.

Procedure:

1. The wastewater from bathrooms and toilets is collected by pipelines to the chambers.
2. All the chambers are connected to the septic tank having capacity of about 125000 lit.
3. From septic tank, water is lifted to sewage treatment plant where the treatment of waste water is taking place with filtration & disinfection.
4. The treated water is stored in underground water storage tank having capacity 50000 lit.
5. From underground water tank the water is distributed for the purpose of gardening, watering of trees in the college campus area.
